

Mini - **DROEVENDALIA**

Mini-Droevendalia 82a, Januari 2013. Appears at the right moment; for example in case of Internet-problems

As you probably have noticed, our **Internet** is working quite *stacatto* or not at all. The WUR ICT servicedesk is not always that adequate and asks us to fill in irrelevant forms. However, according to the last rumors this problem might be solved tomorrow (Friday Jan 4th), or even later. Probably, the cause is not a badly connected router but a physical defect somewhere. If you want to add pressure: Servicedesk.IT@wur.nl or (0317) 48 88 88.

After a few years of absense, the **Droevendaal Pet Inventory** will take place again in the coming weeks! Somebody will pass by and ask you about your pets. Be prepared!

Dear Droevendaal,

Has someone **lost his or her turkey**? It is a white, jong and quite battered. It is now in our cage with the other turkey. Ring the door bel at 59.

Regards Brend

Quote of the week:

"Just spend 12 minutes on the phone explaining that internet is too slow to load my email before the connection is lost again, so it is impossible to download the stupid question list, therefore impossible to answer them and send it back. He kept on repeating that without the answers they could not do anything, so I asked him what he thinks that I should do besides waiting until the problem solves itself. The answer was: answer the questions. So after explaining it again he finally said he would send a notice to the network-guys with the situation, but still he would have to send me the list of questions for me to answer because that is the procedure. My god, bureaucrats ☹"

pls note: to save trees, this paper is 2nd hand and thus the backside may contain irrelevant info. Please ignore.
